

Solar Eclipse – April 8th

Partial eclipse: 2:11 pm to 4:25 pm • **Total eclipse:** 2 to 3 minutes between 3:25 pm and 3:40 pm

Observe the solar eclipse safely:

Use the certified glasses at your disposal.

If you buy glasses yourself, they must comply with the international standard ISO 12312-2.

Check the lenses for damage or scratches before use. No holes, cracks or peels are acceptable.

Always wear your solar eclipse glasses during the eclipse.

Supervise children watching the eclipse with you at all times.

Avoid observing the eclipse through a lens (e.g. cell phone, binoculars, telescope) without a suitable solar filter.

If you are outdoors or driving a vehicle during the eclipse:

Wear a wide-brimmed hat

Don't look in the direction of the sun

Certified glasses should not be used while on the go
